Visit strengthens China links

WARRNAMBOOL Education

TWO academics from the Changchun Centre from Disease Control are forging closer links with Deakin Rural Health during a six-day visit to Warrnambool.

Hu Ming and Shen Xue will visit the Deakin University Warrnambool Campus and health services across

the district.

The visit could lead to chronic condition management programs used in south-west Victoria being adapted to help millions of people in China.

Interim director of Deakin Rural Health, Dr Vincent Versace, said this could be the first of many potential exchanges between the

health centres.

“We hope into the future to embark on different types of exchange programs for undergraduate and post-graduate students,” he said.
